Graphic communication as the name suggests is communication using graphic elements. These elements include symbols such as glyphs and icons, images such as drawings and photographs, and can include the passive contributions of substrate, color and surroundings. It is the process of creating, producing, and distributing material incorporating words and images to convey data, concepts, and emotions.

The Xerox Alto is the first computer designed from its inception to support an operating system based on a graphical user interface (GUI), later using the desktop metaphor. The first machines were introduced on 1 March 1973, a decade before mass market GUI machines became available. The Alto is contained in a relatively small cabinet and uses a custom central processing unit (CPU) built from ...

Abstract. The ubiquity of frustrating, unhelpful software interfaces has motivated decades of research into

“Human-Computer Interaction.” In this paper, I suggest that the long-standing focus on interaction may be misguided.
