Agile Product Management is a Team-Oriented Methodology. I'm going to rip the bandage off in one quick motion here: No, you really can't make agile product management work if you're the only person in your company who will be using it. That's because, fundamentally, agile is a team-based approach.

Can Agile Product Management Work in a Non-Agile Company?

The whole product is only tested at the end. If bugs appeared early, but discovered late, the cost of the fix could be pretty high. Because of these problems, Agile methodology evolved for software product development. In simple terms, Being Agile is the ability to adapt to changes when required.

Product Development using Agile Methodology

Agile requirements are a product owner's best friend. Product owners who don't use agile requirements get caught up with spec'ing out every detail to deliver the right software (then cross their fingers hoping they've spec'ed out the right things).

Creating a lean, mean product requirements machine

Agile Product Management Okay, before we dive into the tips on Agile Product Management, let us first look into what Agile Product Management is! A Product Owner in the Scrum Framework is the single person who is responsible for the success of a Product and for maximizing the value of that Product.
