Statistics for Business and Economics

Statistics is a branch of mathematics dealing with data collection, organization, analysis, interpretation and presentation. In applying statistics to, for example, a scientific, industrial, or social problem, it is conventional to begin with a statistical population or a statistical model process to be studied. Populations can be diverse topics such as "all people living in a country" or ...

How the Government Measures Unemployment

Understanding the Basic Security Concepts of Network and System Devices. Network devices "such as routers, firewalls, gateways, switches, hubs, and so forth" create the infrastructure of local area networks (on the corporate scale) and the Internet (on the global scale).

Understanding the Basic Security Concepts of Network and

Basic Networking Tutorial - a network is any collection of independent computers that communicate with one another over a shared network medium. A computer network is a collection of two or more connected computers. When these computers are joined in a network, people can share files and peripherals such as modems, printers, tape backup drives, or CD-ROM drives.
