The graphics display resolution is the width and height dimension of an electronic visual display device, such as a computer monitor, in pixels. Certain combinations of width and height are standardized and typically given a name and an initialism that is descriptive of its dimensions. A higher display resolution in a display of the same size means that displayed photo or video content appears ...

A plasma display panel (PDP) is a type of flat panel display that uses small cells containing plasma; ionized gas that responds to electric fields.. Until about 2007, plasma displays were commonly used in larger televisions (30 inches (76 cm) and larger). Since then, they have lost nearly all market share due to competition from low-cost LCD displays and more expensive but high-contrast OLED ...
