Introduction. Some forms of chemical biology attempt to answer biological questions by directly probing living systems at the chemical level. In contrast to research using biochemistry, genetics, or molecular biology, where mutagenesis can provide a new version of the organism, cell, or biomolecule of interest, chemical biology probes systems in vitro and in vivo with small molecules that have ...

An arbuscular mycorrhiza (plural mycorrhizae or mycorrhizas, a.k.a. endomycorrhiza) is a type of mycorrhiza in which the fungus (AM fungi, or AMF) penetrates the cortical cells of the roots of a vascular plant. (Not to be

confused with ectomycorrhiza or ericoid mycorrhiza.). Arbuscular mycorrhizas are characterized by the formation of unique structures, arbuscules and vesicles by fungi of the ...

The overriding importance of disulphide bonds can be demonstrated by the addition of reducing agents weakening dough and of thiol-blocking or oxidizing agents strengthening dough (Wieser, 2003). During the whole process of breadmaking, the state of large glutenin polymers is characterized by three competitive redox reactions: (1) the oxidation of free SH groups which support polymerization; (2 ...
