REVIEW Problem seeking-an-architectural-programming-primer

Architectural programming is a team effort that requires close cooperation between architects and their clients. Problem Seeking, Fourth Edition lays out a five-step procedure that teams can follow when programming any building or series of buildings, from a small house to a hospital complex.

Problem Seeking: An Architectural Programming Primer

William M. Peña, FAIA, a retired partner of Caudill Rowlett Scott, is often referred to as the "father" of architectural programming, having spent more than fifty years developing, refining, and explaining the programming process.

Problem Seeking An Architectural Programming Primer 5th

Design is problem solving; programming is problem seeking. The end result of the programming process is a statement of the total problem; such a statement is the element that joins programming and design. The "total problem" then serves to point up constituent problems, in terms of four considerations, those of function, form, economy and time.
