NPTEL :: Mechanical Engineering - Refrigeration and Air

Fundamentals of Refrigeration 3.1 Refrigeration Cycles 3 A refrigeration system moves heat from a space, fluid or material for the purpose of lowering its temperature. In the past, this was done by collecting ice in the winter and using its specific heat to cool as the ice melted. When 1 pound of ice melts, it absorbs 144 Btu, as latent energy.

Fundamentals of Refrigeration - Daikin Applied

The Danfoss product range for the refrigeration and air conditioning industry Danfoss Refrigeration & Air Conditioning is a worldwide manufacturer with a leading position in industrial, commercial and supermarket refrigeration as well as air conditioning and climate solutions. We focus on our core business of making

The Danfoss product range for the refrigeration and air

Modern Refrigeration and Air Conditioning is the HVACR standard for a new generation of learner. Whether you're in a digital or print, on-ground or hybrid environment, this integrated learning solution will engage students with resource elements including textbook content, an online learning platform, video clips, narrated animations, digital ...
