Fundamentals of Statistical Signal Processing, Volume III

Signal processing is a subfield of mathematics, information and electrical engineering that concerns the analysis, synthesis, and modification of signals, which are broadly defined as functions conveying "information about the behavior or attributes of some phenomenon", such as sound, images, and biological measurements. For example, signal processing techniques are used to improve signal ...

Signal processing - Wikipedia

Detection theory or signal detection theory is a means to measure the ability to differentiate between information-bearing patterns (called stimulus in living organisms, signal in machines) and random patterns that distract from the information (called noise, consisting of background stimuli and random activity of the detection machine and of the nervous system of the operator).

Detection theory - Wikipedia

A Mathematical Theory of Communication - Bret Victor

OK, with that "legal stuff" out of the way, here is the list of free online book titles, authors, and web addresses: DSP: THEORY . The Scientist and Engineer's Guide to Digital Signal Processing, 2/E (Steven Smith)

Free DSP Books on the Internet - Rick Lyons

Signal detection theory (SDT) may be applied to any area of psychology in which two different types of stimuli must be discriminated. We describe several of these areas and the advantages that can be realized through the application of SDT. Three of the most popular tasks used to study ...

Calculation of signal detection theory measures | SpringerLink

A Web site designed to increase the extent to which statistical thinking is embedded in management thinking for decision making under uncertainties. The main thrust of the site is to explain various topics in statistical analysis such as the linear model, hypothesis testing, and central limit theorem

New Quantum Gravity Theory and Rotation Curve of Galaxies. Authors: Ravindra Sidramappa Mundase

Comments: 8 Pages. The rotation curve of galaxy is a graph of the rotational velocity of stars, gas and other bodies orbiting around the center of galaxy and their radial distance from the centre of galaxy.
