1.2. Stephen's acknowledgments. I would like to thank Lars and Joanna for their hard work on the guide. In a guide like this one there are likely to be at least some minor inaccuracies.

### **The Linux System Administrator's Guide**

A system administrator, or sysadmin, is a person who is responsible for the upkeep, configuration, and reliable operation of computer systems; especially multi-user computers, such as servers. The system administrator seeks to ensure that the uptime, performance, resources, and security of the computers they manage meet the needs of the users, without exceeding a set budget when doing so.
