

zebrafish methods for assessing pdf

Due to the rapid and diverse growth of engineered nanomaterials, it is a challenge for regulators and risk assessors to understand the potential for exposure and whether methods used for assessing conventional chemicals can be used for nanomaterials.

Assessing pain in animals is problematic without a distinct definition. We provide clear criteria for animal pain that can be used to evaluate if pain occurs.

Defining and assessing animal pain - ScienceDirect

GloFish is a patented technology which allows GM fish (tetra, barb, zebrafish) to express jellyfish and sea coral proteins giving the fish bright red, green or orange fluorescent colors when viewed in ultraviolet light. Although the fish were originally created and patented for scientific research at the National University of Singapore, a Texas company, Yorktown Technologies, obtained rights ...

Fig. 2. Probability plots of rates of soil erosion from agricultural fields under conventional (e.g., tillage) and conservation agriculture (e.g., terracing and no-till methods), with erosion rates from areas and plots under native vegetation, rates of soil production, and geologic rates of erosion (a composite distribution of the data for cratons, soil-mantled landscapes, and alpine areas in ...

Soil erosion and agricultural sustainability | PNAS

A genetically modified organism (GMO) is any organism whose genetic material has been altered using genetic engineering techniques. The exact definition of a genetically modified organism and what constitutes genetic engineering techniques varies widely, with the most common being altered in a way that does "not occur naturally by mating and/or natural recombination".

Genetically modified organism - Wikipedia

Dr. Jay Gan is a Professor of Environmental Chemistry in the Department of Environmental Sciences at UC Riverside, where he also served as the Department Chair in 2007-2010.

Kidney transplantation is the treatment of choice for patients with end-stage renal disease, due to associated lower rates of morbidity and mortality when compared to dialysis 1-3. Despite major improvements in patient outcomes following kidney transplantation, graft shortage still poses a severe challenge worldwide.

Heterotopic Renal Autotransplantation in a Porcine Model

Society of Toxicology - Annual Meeting 2017

The excited electrons in the conduction band lose their energy in form of heat to the surrounding media; the heat generation is the basis of the photothermal therapy (Jain et al. 2008). In these experiments, gold nanoparticles are designed to absorb light in the water window of ~800–1200 nm by virtue of their shape.
